

No	Course Information (2019-2020)																	
1	Unit name:	Computer Networking																
2	Code:	EcE-61015																
3	Classification:	Engineering subject																
4	Credit value:	3 (2-0-2)																
5	Semester/ Year Offered:	1/6																
6	Pre-requisite:	Communication Principles, Computer Communication, Digital Communication, Wireless and Mobile Communication																
7	Mode of delivery:	Lecture, Presentation, Practical																
8	Assessment system and breakdown of marks:	Tutorial, Assignment, Lab Report, Exam																
	Tutorial and Assignment	10%																
	Practical	20%																
	Mid-term/ final Examination	70%																
9	Academic staff teaching unit:	Department of Electronic Engineering																
10	<p>Course outcomes of unit:</p> <p>In this course students will be able to</p> <ol style="list-style-type: none"> 1. Explain basic concepts of computer networking, application layer protocols, transport layer protocols, network layer protocols and their associated applications 2. Calculate delay, throughput, fragmentation, IP addressing and routing algorithms 3. Design a computer network for specific application 4. Design and analyze routed networks using packet tracer and Wireshark software and implement the network design using Mikrotik Routers 																	
11	<p>Synopsis of unit:</p> <p>This course covers the basic network components, network layering and their basic protocols. This course introduces to the students access and switching techniques, performance of packet switches and network security attacks. This course also includes virtual circuits, datagram networks and routing algorithms. Successful completion of this course will allow students to study more advanced topics in the area of networking.</p>

Lab	Activity
1	<p>Experiment I: Making Straight-Through and Cross-Over Cable</p> <p>Objectives:</p> <ul style="list-style-type: none"> ➤ To apply twisted-pair cables ➤ To implement the straight-through cable and cross-over cable <p>Equipment Required:</p> <ul style="list-style-type: none"> ➤ Shielded/unshielded twisted pair cable (CAT 5e or CAT 6), Crimping tool, RJ 45 connectors , Cable Tester
2	<p>Experiment II: Configuration of Wired and Wireless network</p> <p>Objectives:</p> <ul style="list-style-type: none"> ➤ To be able to configure wired and wireless network <p>Equipment Required:</p> <ul style="list-style-type: none"> ➤ Computers, switch, wireless router, wireless devices, network cables, Packet tracer software
3	<p>Experiment III: Configuration of DHCP, FTP, DNS, WEB and E-MAIL Services</p> <p>Objectives:</p> <ul style="list-style-type: none"> ➤ To configure servers ➤ To upload and download files <p>Equipment Required:</p> <p>Computers, Switches, Network cables, servers, Packet tracer software</p>
4	<p>Experiment IV: Configuration of DHCP Service for Different Networks</p> <p>Objectives:</p> <ul style="list-style-type: none"> ➤ To assign IP addresses using DHCP <p>Equipment Required:</p> <p>Computers, Switches, Router, Network cables, Packet tracer software</p>
5	<p>Experiment V: Configuration of VLAN</p> <p>Objectives:</p> <ul style="list-style-type: none"> ➤ To configure VLAN <p>Equipment Required:</p> <p>Computers, Switches, Network cables, Packet tracer software</p>
6	<p>Experiment VI: Configuration of Router on a Stick</p> <p>Objectives:</p> <ul style="list-style-type: none"> ➤ To configure VLAN using switch and router <p>Equipment Required:</p> <ul style="list-style-type: none"> ➤ Computers, Switches, Router, Network cables, Packet tracer software
7	<p>Experiment VII: Configuration of Complex Routed Network</p> <p>Objectives:</p> <ul style="list-style-type: none"> ➤ To study the routing functions <p>Equipment Required:</p> <ul style="list-style-type: none"> ➤ Computers, Switches, Router, Network cables, Packet tracer software

8	<p>Experiment VIII: Configuration of Complex Routed Network using RIP</p> <p>Objectives:</p> <ul style="list-style-type: none"> ➤ To study the routing functions and routing protocols <p>Equipment Required:</p> <ul style="list-style-type: none"> ➤ Computers, Switches, Router, Network cables
9	<p>Experiment IX: Configuration of Complex Routed Network using OSPF</p> <p>Objectives:</p> <ul style="list-style-type: none"> ➤ To study the routing functions and routing protocols <p>Equipment Required:</p> <p>Computers, Switches, Router, Network cables</p>
10	<p>Experiment X: Packet analysis using Wireshark</p> <p>Objectives:</p> <ul style="list-style-type: none"> ➤ To sniff and analyze packets <p>Equipment Required:</p> <ul style="list-style-type: none"> ➤ Computers, Wireshark software

No	Course Information (2019-2020)	
1	Unit name:	Humanities and Social Science
2	Code:	HSS-61011
3	Classification:	Compulsory
4	Credit value:	3 (3-0-0)
5	Semester/ Year Offered:	1/6
6	Pre-requisite:	NA
7	Mode of delivery:	Lecture, Group Work, Discussion, Case studies, Assignment, Presentation
8	Assessment system and breakdown of marks:	
	Exam	40%
	Group Work, Discussion, Case studies, Assignment, Presentation, Activity	60%
9	Academic staff teaching unit:	
10	<p>Course outcome of unit:</p> <p>In this course, students will be able</p> <ul style="list-style-type: none"> (i) To recognize the role and importance of social science subjects and describe relationships between personal interests and humanities subjects (ii) To apply the ethical framework to everyday ethical decisions (iii) To identify and discuss how people are affected by the environment, development, economics and health (iv) To apply knowledge and skills to contemporary problems and issues 	
11	<p>Synopsis of unit:</p> <p>The course introduces students to the study of various topics in humanity and social science. Course covers the society development studies, study on impact of economics on society development, safety and public health consideration, environmental science and engineers, engineering ethic and importance of international relations.</p>	
12	<p>Topic:</p> <ul style="list-style-type: none"> 1. Social Science and Humanities <ul style="list-style-type: none"> 1.1 Society 	

	<ul style="list-style-type: none">1.2 What is Social Science?1.3 What are the Humanities?2. Philosophy and Ethics<ul style="list-style-type: none">2.1 What is Philosophy?2.2 Epistemology2.3 Ethics2.4 Philosophies from around the World3. The Environment<ul style="list-style-type: none">3.1 What is the Environment?3.2 Maintaining a Balance in Nature – Cause and Effect3.3 Resources3.4 Human Impacts on the Environment4. Economics<ul style="list-style-type: none">4.1 What Is Economics?4.2 Microeconomics4.3 Macroeconomics4.4 Economic Indicators4.5 Taxes and Fiscal Policy4.6 International Trade5. The Development<ul style="list-style-type: none">5.1 What is Development?5.2 Economic Development5.3 Ideas about Development5.4 Criticisms of Development5.5 Measuring Development5.6 Measuring Poverty5.7 Sustainable Development, the SDGs and the MDGs5.8 Environmental and Social Impacts of Development6. Public Health<ul style="list-style-type: none">6.1 Health6.2 Public Health6.3 Public Health Policy
